

FOLLOW-UP REPORT ON EARLY UEF BARRELS FOR STD PRO

Newsletter 384 featured articles on Barrel Proof P marks and Std Pro 1985231 with a UEF 1-43 barrel. That barrel has a proof P that appears to have serifs, but the marking wasn't clearly stamped. Since that time, Dan Pinto has reported Std Pro 1985373, only 142 numbers later, with a UEF 4-43 barrel that confirms the serifs at the top and bottom of the stem of the Proof P. Both of these carbines were most likely within the first shipment that Std Pro made to the government on July 6, 1943.
